

L series

Your voice, wherever you go

The L series from Smartbox is designed so your voice is always with you, everywhere you go. Grab hold of the tactile handle, mount it to your wheelchair, or attach the strap to carry it on the move.

Available in two sizes and in a choice of colours.

Smartbox

Accessibility in mind

With oversized and tactile blue power and volume buttons, it's easier to take full control of your device. We've also added LED indicators with audio confirmation to let you know when switches are activated and when your battery is charging.

Life happens

Whether you're using our next-gen communication aid at home, school, work or on-the-go, it's ready for the inevitable knocks and bumps of everyday life. The L Series is IP22 rated, comes fitted with an antiglare screen protector and is drop tested to 1m.

Versatile positioning

The rubberized adjustable stand is perfect for changing position and accessing the screen at any angle. Use your L series in the way that works for you, including on a flat surface, to comfortably access communication.
